## **DETAILED ACTION**

**This is a response to the applicant's filing on June 19, 2005 with original claims 1-20 currently presented in the instant application.**

### **Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4, 5-9 and 20 are drawn an optical filter feature in producing right color for light sources, classified in class/subclass 353/ 85.
  - II. Claims 1-4 and 10-20 are drawn to computer readable code for producing color light sources, classified in class/subclass 340/825.22.
1. Inventions I and II are as method/process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the method/process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process/method. (MPEP § 806.05(e)). In this case the light sources in the invention I require filter devices to clean/filter right color for particular light sources while that feature does not require in the invention II.
  2. Because these inventions I and II are distinct for the reasons given above and the search required for each Group are different, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
